

## Paraeducators - Fund the promise

- Since 2012, the legislature has been building the infrastructure for a comprehensive paraeducator development program
- One significant element of the program is training all 28,000 paraeducators
- The PESB (Professional Educator Standards Board) and Paraeducator Board have developed the training as directed by the legislature:
  - 4 days (7 hours per day) of general training within one year of hire or once funding is received
  - 10 days (7 hours per day) of advanced training within three years of hire or once funding is received

- Training is no longer required and will not occur unless the legislature provides \$25 million per year for four days of training per year for each of the next four years.
